

OAKLAND, (CA) – December 19, 2011 - For immediate release

CSI³ announces that it will feature the latest releases for applications, appliances and drivers built on Tridium's Niagara^{AX} Framework at the AHR Expo 2012, January 23-25 at McCormick Place, Chicago, IL. The company will exhibit at Booth 3459.

CSI³ will showcase several new enhancements to its industry-leading analytics and diagnostics platform, **Prophet**, including:

- Energy Analytics: Offering real time monitoring and control of all integrated systems for load shedding, curtailment and/or ADR functionality.
- Fault Detection/Diagnostics: Providing additional functionality for detection and diagnostics, enterprise-wide, including a set of *Advanced Alarming* dashboards for at-a-glance anomalies and quick corrective measures.

Newly released applications and solutions to be showcased include:

- TenantEye: The industry leading, open software appliance for tenant metering, sub-metering, overrides and invoicing – including a tenant “smart phone” interface for overrides.
- File/Table Driver Niagara^{AX}: Importing, modeling and exporting file data from 3rd party software, business and enterprise packages into Niagara has never been easier with our File/Table Driver. Take it for a spin with our **FREE demo download**.
- DNP3 Driver for Niagara^{AX}: DNP3 is an open protocol specification for electrical and metering equipment. This driver allows the user to integrate, monitor and control equipment that uses the DNP3 protocol.

CSI³ creates leading-edge applications, appliances and drivers, and helps create OEM solutions for partners looking to leverage an open platform like Niagara. If you are looking for innovative solutions or have imagined a future software and automation front-end for your product(s), visit www.csicubed.com or contact sales@csicubed.com.

About CSI³

CSI³ is the global innovator in open solutions available on the industry's leading automation platform – Niagara^{AX} Framework, by Tridium, Inc. We are the first and leading application, appliance and driver developers for the open, commercial automation industry, and continue to lead the charge for offering scalable, easy-to-use, open, intelligent solutions in the automation market.

CSI³ technology and applications have fundamentally changed the way the world connects and integrates with each other and their enterprise. CSI³ is a DBA of Controlco. Additional information is available at www.csicubed.com.
